Communication is key

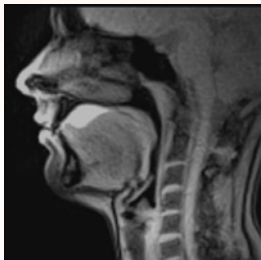

BHF NO: 8214131HPCSA:STA0016683

JOHANNESBURG SPEECH PATHOLOGY & AUDIOLOGY

ABOUT YOUR PATIENTS:

EAR: Do your patients complain that their ears are troubling them? Do they suffer from painful, discharging, and/or ringing ears? Do they struggle to hear what other people are saying?

THROAT: is your patient a professional voice user who suffers from constant hoarseness, sore throat, and difficulties producing voice?

COMMUNICATION AND

SWALLOWING: does your patient (or their child) have difficulties with speech and/or language production? Do they suffer from feeding and/or swallowing difficulties?

ABOUT US

We have a **specialized hearing clinic** where tinnitus (ringing in the ear), vertigo (dizziness), and decreased hearing are tested and treated, **hearing aids fitted** with close collaboration with an ENT Surgeon.

We offer treatment for all **communication related disorders** stemming from ear diseases and/or hearing disorders, mouth and throat related disorders, and difficulties related to disorders in the structures of the head and neck.

We treat communications problems such as delayed speech and language development, impaired speech and language following strokes and head injury, etc.

We treat **feeding, swallowing and voice problems** in children and adults.

We do all the above for **medico-legal** purposes where we conduct assessments based on referrals by the legal fraternity for medico-legal purposes
